

CHOURE BHAGVANTA SAKHARAM

Automation Test Engineer

Mumbai | +91 96375 15958 | bhagvanta95@gmail.com | linkedin.com/in/bhagvanta-choure-94881428a | github.com/Choure123-hub

PROFILE SUMMARY

Detail-oriented QA professional with 5+ years of experience in Manual and Automation Testing, spanning Functional, Globalization, UI, API, and Mobile testing. Skilled in building automation frameworks using Playwright with TypeScript (BDD), Selenium WebDriver with Java, Appium, and Maestro, with hands-on experience across Native and Flutter mobile applications, CI/CD integration, and Agile delivery.

CORE EXPERTISE

- Manual Testing & Automation Testing
- Playwright with TypeScript
- Selenium WebDriver with Java
- Mobile Automation: Appium, Maestro
- API Testing (Postman)
- MySQL, Database Testing
- JIRA, Bug/Defect Life Cycle
- BDD Cucumber, TestNG
- Jenkins, GitLab (CI/CD)

WORK EXPERIENCE

Automation Test Engineer — Vervali Systems, Mumbai

October 2024 – Present

- Working as an Automation Test Engineer, building and maintaining a BDD automation framework using Playwright with TypeScript for web testing and Appium for mobile testing, alongside script execution and defect reporting.

Project: Domestic Worker | Domain: Security | Client: Emaratech

Supported a government-directed initiative in Dubai (MOHRE, GDRFA, Digital Dubai Insurance, DAHC, ICP) enabling sponsors to manage domestic worker services — new, renewal, and cancellation — through the Digital Dubai mobile platform.

Automation Test Engineer — Deegee Software

December 2019 – October 2024

Project: Nutshell | Domain: Telecom | Client: Allstate, USA

Tested a CRM platform integrating Sales and Customer Support with Back-office Operations and Finance, unifying front-office (CRM) and back-office (ERP) customer interaction workflows.

KEY RESPONSIBILITIES

- Analyzed requirements and collaborated with the BA team for clarity on deliverables.
- Identified end-to-end test scenarios, test cases, and test data; wrote optimized test cases in JIRA using Black Box techniques.
- Performed Functional, Regression, Sanity, and Re-Testing; validated output against database records using SQL.
- Logged and tracked defects in JIRA, coordinating with onsite leads through the defect life cycle.
- Designed and executed automated web test scripts using Playwright with TypeScript in a BDD (Cucumber) framework for functional and regression testing.
- Automated mobile app testing using Appium and Maestro for Android and iOS across Native and Flutter apps.
- Built and maintained Appium automation frameworks using Java, Maven, and TestNG; used UI Automator Viewer and Appium Inspector for element identification.
- Wrote Maestro YAML test flows for fast, declarative mobile UI automation and integrated them into the mobile testing pipeline.
- Integrated automated test suites with Jenkins for CI/CD pipeline execution.
- Participated in daily scrum meetings and sprint backlog analysis under Agile methodology.

PROFESSIONAL SYNOPSIS

- Strong understanding of SDLC and STLC, with experience in Agile methodology.
- Skilled in Test Design techniques: Equivalence Class Partitioning and Boundary Value Analysis.
- Working knowledge of Java and OOP concepts.
- Experience testing CRM - Telecom Billing (BSS) systems.
- Cross-browser testing on IE, Firefox, and Chrome.
- Prepared SRS-to-test-case mapping sheets and transition documentation for team handovers.

EDUCATION

Bachelor of Engineering — Pune University

June 2013 – May 2018
